A publication of the Government Statistical Service

### **Government Statistical Service**

A service of statistical information and advice is provided to the Government by specialist staffs employed in the statistics divisions of individual Departments. Statistics are made generally available through their publications and further information and advice on them can be obtained from the Departments concerned.

The source for further information about series published in this volume is shown at the foot of each table. Current telephone numbers of these sources as well as general information about the *Monthly Digest of Statistics* can be obtained from the Central Statistical Office, Great George Street, London SW1P 3AQ. Telephone 01-930 5422 Ext. 602.

Enquiries about orders and subscriptions should be made to the publisher, Her Majesty's Stationery Office, PO Box 569, London SE1 9NH. Telephone 01-928 6977.

# Monthly Digest of Statistics

May 1974

## INTRODUCTION

This *Digest* has been prepared by the Central Statistical Office in collaboration with the Statistics Divisions of Government Departments.

The name of the department or organisation providing the statistics is shown under each table. Some of the statistics provided by departments are actually collected by other organisations such as nationalised boards and trade associations. The assistance provided by these organisations, too numerous to mention individually, is gratefully acknowledged.

The figures in the *Digest* are mainly totals for calendar months or monthly averages.

Some of the figures included in this *Digest* are provisional and may be revised in later issues.

### Definitions

A *Supplement of Definitions and Explanatory Notes*, published with the January issue, gives detailed definitions of all the terms and units used in the *Digest*. The following general definitions should be noted in using the *Digest*:

**Area covered.** Except where otherwise stated, all statistics relate to the United Kingdom of Great Britain and Northern Ireland.

#### Units of measurement.

Ton = long ton of 2,240 lb.

Tonne = 1,000 kilogrammes

Gallon = imperial gallon

**Consumption and stocks.** The terms 'consumption', 'disposals' and 'stocks' are defined in detail in the *Supplement* to the *Digest*. Figures of consumption and stocks are seasonal and should be used with caution. The stocks figures given may often relate to only part of the total stocks in the country.

**External trade.** Owing to differences in coverage and timing, figures of imports and exports are not always comparable with those for production, consumption and stocks.

### Symbols and conventions used

**Symbols.** The following symbols are used throughout:

- .. not available
- nil or less than half the final digit shown
- \* average (or total) of five weeks

**Change of basis.** A line drawn across a column between two consecutive figures indicates that the figures above and below the line have been compiled on different bases and are not strictly comparable. In each case a footnote explains the difference.

**Rounding of figures.** In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

### Supplementary tables

Supplementary tables published recently in the *Digest* are listed below, together with the date of issue in which they appeared:

Index of industrial production, monthly figures for the years 1968 to 1971 .....	October 1973
Foreign and coastwise trade of the United Kingdom .....	April 1974

### Change in content

This issue contains a supplementary table on projected Total population of the United Kingdom, Table A (page 160). A note on the assumptions appears on page 159.

Central Statistical Office,

# CONTENTS

	Table	Page
<b>I. National income and expenditure</b>		
Expenditure on the gross domestic product	1	4
Factor incomes in the gross national product	2	5
Index numbers of output at constant factor cost	3	6
Personal income, expenditure and saving	4	7
Consumers' expenditure	5	8
Value of physical increase in stocks and work in progress	6	9
Gross domestic fixed capital formation	7	10
Fixed capital expenditure in manufacturing industry	8	12
Fixed capital expenditure in the distributive and service industries	9	13
<b>II. Population and vital statistics</b>		
De facto or home population	10	14
Age distribution of the population	11	14
Births, marriages and deaths registered	12-13	15
<b>III. Labour</b>		
Distribution of working population	14	16
Employees in employment: all industries	15	17
Employees in employment: production industries	16	18
Civil Service: analysis by ministerial responsibilities	17	20
Numbers of workers employed in agriculture	18	21
Constructional work: operatives employed by contractors	19	22
Overtime and short-time worked by operatives in manufacturing industries	20	23
Unemployed	21-26	24
Employment vacancies filled and unfilled	27	28
Industrial stoppages	28	29
<b>IV. Social services</b>		
National insurance and family allowances	29	30
Family income supplement and attendance allowance	30	31
Supplementary benefits: pensions and allowances	31	31
National health service	32	32
<b>V. Agriculture and food</b>		
Agricultural land: area and harvest	33	33
Livestock, pigs and poultry on agricultural holdings	34-35	34
Production, disposals and stocks of principal foods and feedingstuffs	36-44	35
Tobacco	45	41
Alcoholic drinks	46	42
Estimated household food expenditure and consumption in Great Britain	47-48	43
Energy value and nutrient content of the household diet	49	49
<b>VI. Production, output and costs</b>		
Index of industrial production	50	50
Output per head	51	54
Indices of home costs and labour costs	52	56
Wages and salaries per unit of output in manufacturing industries	53	56
<b>VII. Energy</b>		
Inland energy consumption: primary fuel input	54	57
Production and net arrivals of principal fuels	55	58
Inland energy consumption: heat supplied	56	58
Energy consumption by final users	57	59
Coal supply, consumption and stocks	58-60	60
Gas: sources of supply and sendout	61	62
Generation of electricity	62-63	63
Sales of gas and electricity	64	65
Petroleum and petroleum products	65-66	65
<b>VIII. Chemicals</b>		
Fertilizers	70	68
Sulphur and sulphuric acid	71	69
Synthetic dyestuffs, colours, paint and varnish	72	70
Synthetic resins and plastics materials	73	71
Other miscellaneous products	74	71
<b>IX. Metals, engineering and vehicles</b>		
Iron and steel	75-77	72
Non-ferrous metals	78-79	74
Engineering and allied products: sales of United Kingdom manufactured goods and work done	80	75
Mechanical, instrument and electrical engineering industries: volume index numbers of sales	81	77

	Table	Page
Mechanical, instrument and electrical engineering industries: volume index numbers of orders on hand and net new orders .....	82-83	78
Deliveries of electrical equipment and appliances .....	84	80
Vehicles .....	85-87	80
Merchant shipbuilding .....	88-89	83
<b>X. Textiles and other manufactures</b>		
Textiles .....	90-93	85
Hosiery and footwear .....	94-95	87
Timber and paper .....	96-99	88
Rubber and other manufactures .....	100-102	91
<b>XI. Construction</b>		
Constructional work: output and new orders .....	103-104	93
Building materials and components .....	105	95
Permanent housing .....	106-107	96
Educational building in Great Britain .....	108	98
<b>XII. Transport</b>		
Road and rail transport .....	109-115	100
Civil aviation .....	116	105
Merchant shipping .....	117	107
Passenger movement by sea and air .....	118-119	107
<b>XIII. Retailing and catering</b>		
Index numbers of retail sales and stocks in Great Britain .....	120	109
Index numbers of turnover in the catering trades .....	121	110
<b>XIV. External trade</b>		
Visible trade: value and volume .....	122-123	111
Analysis by commodity classes .....	124-127	112
Analysis by areas and countries .....	128-130	116
Exports and imports of selected commodities .....	131-137	122
Export and import volume and unit value index numbers .....	138-139	126
<b>XV. Overseas finance</b>		
Balance of payments .....	140-142	128
Official reserves and United Kingdom official short and medium-term borrowing .....	143	129
<b>XVI. Home finance</b>		
Consolidated Fund and National Loans Fund .....	144-145	130
Central government Net balance .....	146	131
Inland Revenue .....	147	132
Customs and Excise duties .....	148	132
Bank of England .....	149	133
Banks in the United Kingdom—summary .....	150	134
London clearing banks .....	151	135
Bank clearings and currency circulation .....	152	136
Capital issues and redemptions .....	153	137
Bank advances .....	154	138
Money stock and domestic credit expansion .....	155	140
Reserve ratios, special deposits and undefined assets multiple .....	156	140
Discount houses .....	157	141
Hire purchase and other instalment credit .....	158	142
National savings .....	159	143
Security prices and yields .....	160	144
Bank rate and minimum lending rate .....	161	144
<b>XVII. Wages and prices</b>		
Average earnings and hours of work of manual workers .....	162-163	145
Index of average earnings of all employees .....	164	146
Average weekly earnings of manual workers .....	165	148
Indices of wages rates and normal hours of work of manual workers .....	166-167	149
Changes in basic weekly rates of manual workers .....	168	151
General index of retail prices .....	169-170	152
Index numbers of wholesale prices .....	171	154
Index numbers of agricultural prices .....	172	156
<b>XVIII. Entertainment</b>		
Broadcast receiving licenses and cinemas .....	173	157
<b>XIX. Weather</b>		
Temperature, rainfall and sunshine .....	174	158
<b>Supplementary table and notes</b> .....	A	159

2nd quarter .....											

<sup>(1)</sup> Equals total final expenditure on goods and services at market prices less imports of goods and services less taxes on expenditure plus subsidies. Estimates of the gross domestic product at constant factor cost based on statistics of output are given in Table 3. <sup>(2)</sup> Including a fall in the book value of stocks of £280 million in the second quarter of 1973 reflecting tax rebated on the introduction of VAT; the rebate is also included as a deduction from taxes on expenditure and the estimate of gross domestic product at factor cost is thus not affected. <sup>(3)</sup> This represents taxes on expenditure less subsidies valued at constant rates.

(°) Before providing for depreciation and stock appreciation.

(°) Employers' contributions to national insurance, etc. and pension funds.

(°) National insurance benefits, family allowances, assistance grants, war pensions and service grants, etc.

(°) Income from rent and self-employment, before providing for depreciation and stock appreciation, dividend and net interest receipts and transfers to charities from companies.

(°) Including from 2nd quarter 1973 tax credits on dividends.

(°) Including from 2nd quarter 1973 imputed tax payments set against tax credits on dividends less payments of these tax credits by the Inland Revenue.

(°) Equals total personal income before tax less payment of taxes on income, national insurance, etc. contributions, and net transfers abroad.

(°) Before providing for depreciation, stock appreciation and additions to tax reserves.

(°) Personal saving as a percentage of total personal disposable income is shown in italics.

(°) Personal disposable income revalued by the implied consumers' expenditure deflator (1970 = 100).

<sup>(1)</sup> Including a fall in the book value of stocks of £280 million reflecting tax rebated on the introduction of VAT. The rebate has been allocated as follows:

	£ million
Manufacturers	34
Wholesalers	36
Retailers	181
Other industries	29

This allocation is approximate, particularly in relation to the asset analysis of manufacturers' stocks.

(<sup>1</sup>) Estimates for 1962-70 have been revised in the light of the preliminary results of the 1971 Census. Figures for 1971 and 1972 have been revised and are based on the final results of the 1971 Census.

(<sup>2</sup>) The mid-year estimates, for Scotland from 1962-1972 have been revised in the light of the final results from the 1971 Census.

(<sup>3</sup>) The mid-year estimates for 1971 and 1972 for Northern Ireland have been revised and are based on final figures of the 1971 Census. They are not comparable with the estimates for the period 1961-70, which were linked to the 1961 and 1966 Censuses.

(<sup>4</sup>) The Persons all ages figures for 1962-1970 have been revised in the light of the final results of the 1971 Census. Corresponding revisions for males and females separately will be available later this year.

(<sup>1</sup>) Estimates for June 1969(a) are classified according to the Standard Industrial Classification 1958 and are not fully comparable therefore with the estimates for June 1969(b) which are classified on the basis of the Standard Industrial Classification 1968.

(<sup>2</sup>) See footnote (<sup>1</sup>) to Table 16.

(<sup>3</sup>) The industries included in the index of production are Orders II-XVIII of the Standard Industrial Classification 1958 and Orders II-XXI of the Standard Industrial Classification 1968.

(<sup>4</sup>) Excluding private domestic service.

(<sup>5</sup>) The estimates of agriculture are taken from the June censuses of agriculture and exclude a small number of employees of agricultural machinery contractors. It should also be noted that the figures include seasonal and temporary workers.

June .....													

<sup>(1)</sup> (a) Until 1971 the annual employment statistics were derived mainly from counts of national insurance cards. In 1971 a new system was introduced because of proposals to abolish the use of national insurance cards for employees within the next few years.

(b) The new system relies on returns from employers. In order to provide a link between the old system and the new system, both a card count and a census under the new system were taken in 1971.

(c) The old count of national insurance cards included many employees who work for part of the year only and who would not have been in employment in the particular week in June when the census was taken. Mainly for this reason the census figure for June 1971 is considerably lower than the card count. Another difference is that a person who had two regular jobs with different employers in the week of the census was counted twice in the census but only once in the card count, so that the census figures are higher than the card count in some industries and services where secondary employment is common.

Note: Figures have been rounded independently, thus there may be an apparent slight discrepancy between the sum of the constituent items and the total.

Source: Civil Service Department

(<sup>1</sup>) The figures include established and unestablished non-industrial and industrial staff but exclude casual or seasonal staff (recruited for periods of normally less than six months) and employees of the Northern Ireland Government. Two part-time employees are counted as one whole-time employee.

(<sup>2</sup>) The figures prior to 1 July 1972 have been adjusted to show staff in current Ministerial areas so that the figures in all columns are on a comparable basis.

(<sup>3</sup>) Excluding headquarters staff, but including research and development establishments and Royal Ordnance factories.

(<sup>4</sup>) From 1 April 1974 Royal Ordnance Factories are shown separately.

(<sup>5</sup>) These figures include estimated breakdown of certain staff recently transferred to Ministry of Defence and may be subject to later amendment.

Numbers of workers employed in agriculture <sup>(1)</sup>

Note: This table has been revised and is now based on information from the Census of Employment (see footnote (1) to Table 16). The estimates are not comparable with estimates prior to June 1971 which were based on mid-year counts of national insurance cards.

(1) Orders III-XIX of the Standard Industrial Classification 1968.

(2) Figures relate to establishments with more than 10 employees in all manufacturing industries except shipbuilding and ship repairing.

(\*) Excluding maintenance staff.

(\*) Operatives stood off for the whole week are assumed to have been on short-time to the extent of 40 hours each.

(\*) In February 1972, and again in January, February and March 1974, the volume of overtime and short-time was affected by the energy crisis.

(\*) Figures after June 1973 are provisional and are subject to revision when the results of the 1974 Census of Employment are available.

Note: The presentation of unemployment statistics in this and succeeding tables is on the lines recommended by an Inter-Departmental Working Party *Unemployment Statistics* (Cmd. 5157). See *Department of Employment Gazette*, November 1972.

(<sup>1</sup>) The figures in this table are adjusted to take into account amendments notified on the four days following the date of the count. Figures for married females from May 1972 onwards are not adjusted.

(<sup>2</sup>) The base used in calculating the percentage rate of unemployment is the estimate of total employees (employed and unemployed). The latest figure available is that for mid-1973 and percentages have been revised from January 1973.

(<sup>3</sup>) See note on page 252 of the March 1974 issue of the *Department of Employment Gazette*.

(\*) Number unemployed expressed as a percentage of the estimated total number of employees.

(2) From 1 April 1974 changes were made in the boundaries of some regions following the creation of the new local authorities by the Local Government Act 1972. The regions affected, were North, Yorkshire and Humberside, East Midlands, South East, South West and North West. See *Department of Employment Gazette*, June 1974, page 533.

<sup>(1)</sup> Including ex-service men and women and other unemployed persons aged 18 years and over not classified to an industry. Unemployed school-leavers (i.e. persons under 18 not in full-time education who have not yet taken up employment) and adult students seeking temporary employment during vacation are excluded. The All industries figures are adjusted to take into account amendments notified on the four days following the date of the count. All other figures from May 1972 are not so adjusted.

<sup>(2)</sup> The base used in calculating the percentage rate of unemployment is the estimate of total employees (employed and unemployed). The latest figure available is that for mid-1973 and percentages have been revised from January 1973.

Source: Department of Employment

(<sup>1</sup>) The total unemployment is adjusted to take into account amendments notified on the four days following the date of the count. The analyses by duration from May 1972 onwards are not adjusted. Prior to May 1972, casuals were excluded from this analysis. See *Department of Employment Gazette*, June 1972.

(<sup>2</sup>) Because of the energy crisis the detailed information about duration of unemployment was not collected in these months.

(<sup>1</sup>) Excludes approximately 650,000 workers who were temporarily stopped on the day of the count and whose benefit position has not been ascertained.

(<sup>2</sup>) Excluding temporarily stopped workers from November 1972 onwards.

(<sup>3</sup>) Because of the energy crisis the detailed information about duration of unemployment was not collected in these months.

(<sup>1</sup>) Excludes stoppages involving fewer than 10 workers or lasting less than one day except any in which the total number of working days lost exceeded 100. The figures for 1974 are provisional.

(<sup>2</sup>) From January 1970 the analysis by industries is based on the Standard Industrial Classification 1968. Figures prior to that date are based on the Standard Industrial Classification 1958.

(<sup>3</sup>) Where stoppages extend over more than one month, the workers involved are counted in the month in which they first participated.

(<sup>4</sup>) The figures of working days lost relate to the total working days lost within each of the periods shown as a result of stoppages in progress in that period, whether the stoppages began in that period or earlier.

(1) Figures for individual months are averages of the four or five weeks ending on the last Tuesday of each month.

(2) Invalidity benefit was introduced on 23 September 1971. (3) Including prescribed industrial disease.

(4) Excluding claims made under the emergency benefit procedure. Figures for individual months are averages of the four or five weeks starting on the first Monday of each month.

(5) These figures include substantial numbers of persons who have been sick for a long time and who may no longer be in employment.

(6) Up to May 1972, these estimates are based on a standing sample of claimants. Subsequent figures are provisional estimates derived from the numbers of new claims and will be replaced later by final estimates from the sample. Yearly figures are averages of twelve monthly figures.

(7) Yearly figures are averages of quarterly figures. Quarterly figures relate to the first Monday in February, May, August and November.

(8) Including pensioners in receipt of Old person's retirement pension awarded under National Insurance Acts 1970 and 1971.

(9) Including a diminishing number of widows with pensions of 30s a week derived from the old Contributory Pensions Acts. (10) Figures for 1973 are provisional.

(11) Including the elder or eldest child for whom no allowance is payable.

\* Average of five weeks.

<sup>(1)</sup> Pension age means 65 years for men and 60 years for women.

<sup>(2)</sup> Some of the supplementary pensions provide for the requirements of a household with more than one pensioner.

<sup>(3)</sup> Includes a small number of persons over pension age.

<sup>(4)</sup> The figures for November 1972, May, August and November 1973, January and April 1974 now exclude the unemployment cases who received no payment of supplementary pension or allowance during the week of the count.

<sup>(5)</sup> The quarterly count of Supplementary benefit recipients was not conducted for that month.

<sup>(6)</sup> Provisional.

<sup>(1)</sup> In June 1970 the census was extended in Great Britain to cover all holdings with significant output (26 standard man-days or more) including those on one acre or less of agricultural land (previously excluded); at the same time about 16,000 holdings in Scotland with negligible output were excluded from the census. In Northern Ireland figures up to 1972 relate to holdings of one acre or more, except for numbers of livestock, which were collected from all owners, irrespective of the size of the holding, as well as from landless stockholders. As from June 1973 the threshold for inclusion in the census was raised from 26 to 40 standard man-days in Great Britain, excluding from the census about 3,000 holdings on 18,000 acres of land in England and Wales and nearly 5,000 holdings on 167,000 acres in Scotland. At the same time the 40 man-day concept was introduced in Northern Ireland resulting in the elimination from the census of some 8,000 statistically insignificant holdings on 40,000 acres of land and the inclusion of 2,000 or so holdings previously excluded (except to the extent of obtaining estimates of numbers of livestock on them) because they had less than one acre of land. The United Kingdom figures now relate to all known holdings with 40 standard man-days or more; in England and Wales and Northern Ireland holdings with less than 40 standard man-days are included only if they have 10 acres or more of crops and grass or at least one regular whole-time worker. <sup>(2)</sup> Excludes Scotland. <sup>(3)</sup> Includes maize for threshing in England and Wales. <sup>(4)</sup> Weight in pods. <sup>(5)</sup> Shelled weight. <sup>(6)</sup> Includes vegetables grown under glass. <sup>(7)</sup> England and Wales only. <sup>(8)</sup> Clover and rotation grasses including lucerne in England and Wales. <sup>(9)</sup> Production figures relate to hay only. The production of hay in England and Wales is calculated from the area cut for hay and actually harvested and does not include the area mown for silage, drying or seed: the production of hay in Scotland and Northern Ireland is calculated from the area cut for hay only and does not include grass mown for silage or drying. <sup>(10)</sup> Includes hay from lucerne in England and Wales and from permanent grass in Scotland. <sup>(11)</sup> Includes the total area of deer forest land in Scotland.

(<sup>1</sup>) A small quantity of molasses spirit is used in beverage spirit production. See explanatory notes in the Supplement to Table 74. (<sup>2</sup>) The sub-headings indicate the description of the spirits at the time of duty payment. (<sup>3</sup>) From July 1973 separate information of clearance in bottle is not available for wine at other rates of duty. (\*) Provisional.

<sup>(1)</sup> For a description of this series, see the article on page 360 of the April 1971 issue of *Department of Employment Gazette*.

Sources: Central Statistical Office  
Department of Employment

<sup>(2)</sup> Quarterly estimates are derived as averages of the monthly figures.

<sup>(3)</sup> In the absence of earnings data for February 1972 due to the effects of the coalmining dispute no index of wages and salaries per unit of output has been calculated for that month. The indices calculated for January and March 1972 are less reliable than usual.

(\*) Coke oven gas, creosote/pitch mixtures and other liquid fuels derived from coal.

(2) Town gas and natural gas supplied direct.

(3) From April 1973 the figures relate to colliery disposals for the domestic market.

(\*) Provisional.

(<sup>1</sup>) Because of the coal miners' strike which began 9 January 1972, the statistics are incomplete.

(<sup>2</sup>) An overtime ban by mineworkers started on 12 November 1973, followed by a national strike on 10 February 1974. Normal working was resumed on 11 March.

\*Average of five weeks.

<sup>(1)</sup> From January 1971, figures relate to sales by manufacturers in Great Britain employing 25 or more persons, and who are classified to MLH 274 (paint). The figures also include sales of principal products of this industry by establishments classified to MLH 271 (general chemicals) and MLH 494/1 and 2 (toys, games and children's carriages).

From third quarter 1971, the figures relate to sales by manufacturers in the United Kingdom.

<sup>(1)</sup> Industrial ethyl alcohol is distilled from molasses or derived from other processes: the current usings of molasses spirit in beverage spirit production are believed to be comparable with the usings in the preceding financial year—see explanatory notes.

<sup>(2)</sup> From July 1971 figures relate to sales by manufacturers in the United Kingdom employing 25 or more persons and who are classified as MLH 275 (soap and detergents). The figures also include sales of synthetic detergents by establishments classified to MLH 271 (general chemicals), MLH 272 (pharmaceutical chemicals and preparations) and MLH 279/1 (polishes).

<sup>(3)</sup> A short standard is 7,200 matches.

(1) At steel works and steel foundries. (2) At steel works, steel foundries and blast furnaces.

(3) Stocks at producers' works of ingots, semi-finished and finished steel in terms of ingot equivalent. From March 1970 and March 1973 the figures are revised due to re-measurement.

(4) From January 1971, figures include stock of semi-finished steel for the manufacture of heavy products previously not reported.

(5) The figures for 1970 onwards include deliveries of welded tubes over 16 inch outer diameter.

(6) 53 week period.

\* Average of five weeks.

(<sup>1</sup>) Including chassis delivered as such by manufacturers. The value of deliveries of commercial vehicles is shown in Table 86.

Source: Department of Industry

(<sup>2</sup>) Beginning in 1973 the headings under which data are collected were changed. The new heading of Car derivatives (i.e. vans derived from car chassis) has virtually the same coverage as the heading it replaced, Commercial vehicles not over 1½ tons. Although not all commercial vehicles under 1½ tons gross vehicle weight are classed as car derivatives and it is also possible for car derivatives to exceed 1½ tons gross vehicle weight, the difference between the two categories is small as far as UK production is concerned. The series as given may therefore be regarded as sufficiently continuous for the analysis of trends. The combination of the two series, car derivatives and commercial vehicles under 10 tons gross vehicle weight is identical in coverage with the sum of the two series that have been superseded.

(<sup>3</sup>) Complete and chassis.

(\*) 53 week period.

\* Five week period.

Merchant shipbuilding<sup>(1)</sup>: tankers of 300 gross tons and over<sup>(2)</sup>

<sup>(1)</sup> Includes naval vessels registered as merchant ships.<sup>(2)</sup> Gross tonnage (100 cubic feet per g. t.) is the total volume of all the enclosed spaces of a vessel.<sup>(3)</sup> The total tonnage specified on ordering vessels differs slightly from the total actual measured tonnage on completion.<sup>(4)</sup> Vessels are shown for export if they are for other than UK registration.<sup>(5)</sup> Modifications include alterations of 500 gross tons or more to the tonnage and the country of registration of vessels already on order.<sup>(6)</sup> Modifications and cancellations exceed new orders for the period.

<sup>(1)</sup> Includes naval vessels registered as merchant ships.

<sup>(2)</sup> Gross tonnage (100 cubic feet per g.t.) is the total volume of all the enclosed spaces of a vessel.

<sup>(3)</sup> The total tonnage specified on ordering vessels differs slightly from total actual measured tonnage on completion.

<sup>(4)</sup> Vessels are shown for export if they are for other than UK registration.

<sup>(5)</sup> Modifications include alterations of 500 gross tons or more to the tonnage and the country of registration of vessels already on order.

<sup>(6)</sup> Modifications and cancellations exceed new orders for the period.

(<sup>1</sup>) Spinning, doubling processing and weaving parts of the cotton industry, plus man-made fibre, wool, carpets and hosiery industries. (<sup>2</sup>) These indices have been adjusted to allow for the differences in the lengths of calendar months but not for holidays or for other seasonal variations. (<sup>3</sup>) The monthly provisional index numbers for individual sectors relate to the total output of manufacturers whose main business is in that sector of the industry. These are subsequently revised in the light of sales figures of the principal products of each clothing sector as reported in the quarterly sales inquiries.

(<sup>1</sup>) The coverage of the inquiry from which this table is compiled was extended at the end of 1970 and the earlier figures have been adjusted to provide a broadly comparable series. It must be emphasised, however, that the conversions have been based on linking factors spanning the 4th quarter 1970 and 1st quarter 1971 only and they should be treated with caution.

1974 1st quarter .....								
2nd quarter .....								

(<sup>1</sup>) From the 3rd quarter 1971 information was collected on a slightly different basis; the figures, therefore, are not fully comparable with those for earlier periods. A link between the two sets of figures is shown in the March 1972 edition of *Business Monitor*, P. 9, Carpets.

(<sup>2</sup>) Prior to the 3rd quarter 1971 these figures relate to woven carpets faced with more than 50 per cent of man-made fibres.

(<sup>3</sup>) Prior to the 3rd quarter 1971 export figures are those reported directly by manufacturers. From that date they are those recorded in the *Overseas Trade Statistics*.

<sup>(1)</sup> Excluding building which is wholly financed from private sources. <sup>(2)</sup> From January 1960 for Scotland and from April 1960 for England and Wales the cost of school meals projects has not been separately recorded. The value of such projects, shown separately for the years 1946 to 1959 in previous tables of educational building, has been included as appropriate under the headings Primary and secondary and Special schools. <sup>(3)</sup> Totals for England and Wales include the value of certain projects for which no analysis between type of project is available. As from October 1961, the individual value of such projects is less than £2,000. <sup>(4)</sup> Figures for England and Wales include the value of projects for which specific approval is not required. <sup>(\*)</sup> Figures for England and Wales relate to project values and those for Scotland to contract values. Figures for Scotland include the cost of certain main projects for which specific approval is not required. <sup>(\*)</sup> The Scottish figures of Under construction and Completions are based on the tender costs. The Under construction and Completions figures exclude the value of approved school projects which in 1969 amounted to £1,246,000 and £406,000 respectively.

(<sup>1</sup>) The method of calculation of the number of new places provided differs in England and Wales and Scotland. In England and Wales the figures refer to the number of pupils for which new school accommodation is designed. In Scotland the figures refer to the sum of the approved capacities of all the teaching rooms whether classrooms or practical rooms, and will normally exceed the number of pupils for which accommodation is designed.

(<sup>2</sup>) Including new schools brought into partial use before completion.

(<sup>3</sup>) Extensions, alterations, remodelling and war damage repairs.

<sup>(1)</sup> Passenger journey figures are not strictly comparable owing to the transfer from British Rail to London Transport railways of the London Paddington to Westbourne Park service on 1 January 1970. In addition, the new 14 mile Victoria Line was opened to traffic by London Transport in four stages on 1 September and 1 December 1968, 7 March 1969 and 23 July 1971. <sup>(2)</sup> The four-weekly averages for each year are computed from calendar year totals.

<sup>(1)</sup> The four-weekly averages for each year are computed from calendar year totals.

<sup>(2)</sup> Freight train traffic only.

<sup>(3)</sup> From January 1969, figures do not include freight carried on behalf of National Carriers Ltd. and Freightliners Ltd.

<sup>(4)</sup> From January 1972, four-weekly figures of net ton mileage are estimated.

(¹) The total currency flow, together with Allocation of Special Drawing Rights. (²) From July 1972 transactions with IMF affecting the United Kingdom reserve position in the Fund are included as changes in the official reserves. (³) From 23 August 1971, valued in sterling at transactions rates of exchange. Therefore, from the third quarter of 1971 the sterling valuations of the flow does not equal the difference between the opening and closing levels which are converted at parity in Table 143.

(<sup>1</sup>) In addition to its lending, the National Loans Fund meets the interest and management charges of the National Debt. To the extent that these charges are not matched by interest received on its own lending and by profits of the Issue Department of the Bank of England, the Consolidated Fund meets the difference. The surplus on the Consolidated Fund is paid to the Fund, leaving the difference between that and its net lending as the Fund's financing requirement. (<sup>2</sup>) Loans under the Ship Credit Scheme and to the Shipbuilding Industry Board, housing associations and building societies. (<sup>3</sup>) Loans to Votes for US military aircraft, Town and Country Planning compensation, Redundancy Fund and lending to Northern Ireland Exchequer.

(<sup>1</sup>) This is equal to Exchequer borrowing and special transactions (net) less receipts from extra-Exchequer funds, etc. It is also equal to the amount the central government borrows less any increase (or plus any decrease) in its official reserves.

(<sup>2</sup>) A negative item represents a surplus, a positive item a deficit.

(<sup>3</sup>) Including in March of each year transfer of surplus of the death duties surrendered securities account.

(<sup>4</sup>) The cumulative monthly figures do not agree precisely with the quarterly figures because of adjustments, incorporated in the latter, for accrued interest on National Savings and for issued coin.

(<sup>5</sup>) Excluding borrowing from the National Loans Fund.

(<sup>6</sup>) Adjustment for redemption of government guaranteed stock.

(<sup>7</sup>) Consolidated Fund liability for service of the National Debt: balance carried over until March.

(\*) Average of figures on Wednesdays.

(\*\*) Months: average of figures on Saturdays in consecutive four-week periods as published in *The London Gazette* or in *The Belfast Gazette*, with as close a correspondence as possible to the calendar months. Years: average of the thirteen published figures.

(2) Total notes and coin outstanding, less notes and coin held by the Bank of England, Banking Department, and by the London and Scottish clearing banks and Northern Ireland banks.

(4) From 1 July 1969 all bank clearings are worked on a 5 day week.

(5) Not comparable with earlier figures owing to mergers among the London clearing banks. See *Supplement of Definitions and Explanatory Notes*.

(6) Not comparable with earlier figures owing to the exclusion of credit transfers processed by Bankers' Automated Clearing Services.

<sup>(1)</sup> In Northern Ireland included in Other manufacturing.

Source: Bank of England

<sup>(2)</sup> The annual figures are averages of the figures for February, May, August and November, except for the Northern Ireland figures for 1970, which comprise the February figures only.<sup>(3)</sup> Because of difficulties of classification it is not possible, before November 1973, to include advances made by the six finance houses recognised or confirmed as banks in January 1972 or January 1973. Advances by five finance houses totalled £1,070 million at mid-May 1972, £1,154 million at mid-August, £1,261 million at mid-November, £1,388 million at mid-February 1973 and by all six £1,711 million at mid-May and £1,894 million at mid-August.<sup>(4)</sup> Figures in several categories have been revised from May 1972 onwards.<sup>(5)</sup> The average for 1972 is calculated after adding to the February figures the difference between the two lines of figures in May.

(<sup>1</sup>) Excluding banks in Northern Ireland. The average for October to December 1973 (the base period for the supplementary deposit scheme) was £20,591 million. (<sup>2</sup>) Minimum 12.5 per cent. (<sup>3</sup>) Virtually all interest bearing. (<sup>4</sup>) Minimum 10 per cent. (<sup>5</sup>) The rates shown apply to all banks, other than those in Northern Ireland and finance houses. (<sup>6</sup>) Broadly speaking, private sector debt. (<sup>7</sup>) Maximum 20 per cent. The capital resources base for the calculation of the multiple in 1974 is 96.

(<sup>1</sup>) Derived from yield-maturity curves fitted mathematically. The break shows a change in the method: an article in the *Bank of England Quarterly Bulletin* December 1972 describes the new method of calculating the curve which is now based on the prices and coupons for all stocks except a few with special features. Before 1971, the curve was fitted to yields on stocks with coupons of 5 per cent or more. (The old method was described in the March 1967 *Bulletin*). The yearly figures are averages of end of month yields. The monthly figures relate to averages of Wednesdays, except for 1971, where they are for end-months. Figures have been revised from January 1973. See article in the *Bank of England Quarterly Bulletin* September 1973.

(<sup>2</sup>) Average of working days, based on the mean of the middle opening and middle closing prices each day, excluding gross accrued interest; tax is ignored. (<sup>3</sup>) Averages of daily figures calculated from middle market closing prices. (<sup>4</sup>) Gross redemption yields of 15 stocks so combined as to give a yield average for a constant 20-year term.

(1) The figures represent the average earnings, including bonus, overtime, etc., and before deduction of income tax or insurance contributions, in one week in the months indicated. Administrative and clerical workers and other salaried persons have been excluded. Certain qualifications are given in a full account of the enquiry relating to October 1973, published in the *Department of Employment Gazette* for February 1974.

Source: Department of Employment

(2) From and including October 1967 includes (a) dock workers previously on daily or half daily engagements and (b) postmen.

(3) This index relates only to the industries covered by the earnings enquiry. It should not be confused with the figures in Table 167 which cover all industries.

## Average weekly hours worked<sup>(1)</sup>

June .....													

(\*) As industrial activity was severely disrupted by restricted electricity supplies the monthly survey was not carried out in February so figures cannot be calculated for this month. (\*\*) The figures reflect temporary reductions in earnings while three day working and other restrictions were in operation during January and February 1974. (\*) Provisional. (\*\*) Insufficient information is available to enable a reliable index for Agriculture to be calculated for the current month but the best possible estimate has been used in the compilation of the index for All industries and services covered.

<sup>(1)</sup> The figures are based upon changes in basic rates of wages or minimum entitlements and reductions in normal weekly hours, which are normally determined by national collective agreements or statutory wages regulation orders. The information relates to the end of the month and, where necessary, the figures may be revised to take account of any changes having retrospective effect or reported belatedly. A brief note on the method of compilation of the figures is given in the current issue of the *Department of Employment Gazette*.

<sup>(2)</sup> In general, males under 21 and females under 18 years of age.

<sup>(3)</sup> The term Manufacturing industries covers all industries included in Orders III-XIX of the Standard Industrial Classification 1968.

(<sup>1</sup>) The figures relate to changes in basic full-time weekly rates of wages or minimum entitlements and do not reflect reductions in normal weekly hours without loss of pay or variations in actual earnings arising from such factors as overtime or lost time. The changes included are those determined by national collective agreements or by statutory wages councils or boards.

(<sup>2</sup>) The monthly totals in the columns headed Increase and Decrease relate to the number of workpeople affected by changes and the corresponding gross amounts. Workpeople affected by two or more changes are counted only once in the annual totals which relate to the number having increases only or for whom increases exceeded decreases, the number having decreases only or for whom decreases exceeded increases, and the corresponding net amounts; the column headed Net increases, is therefore the overall net increase for the year.

(<sup>3</sup>) The annual totals of net increases in basic weekly rates of wages mean that the total wage bill of the country, in the industries and for the workpeople covered by the statistics, for a full ordinary week's work at basic rates of wages at the end of any one year exceeds that for the corresponding week of the preceding year by the amount stated. The average weekly wages paid during any one year will not, however, exceed those paid during the preceding year by this sum, as the actual changes will have taken place at various dates during the year.

(1) The Cost of Living Advisory Committee (now renamed the Retail Prices Index Advisory Committee) recommended in 1962 that until a satisfactory index series based on actual prices became available half the expenditure on meals out should continue to be allocated to the food group and the other half spread proportionately over all groups, including the food group. The index for meals out for 16 January 1968 implicit in this recommendation was 121.4. Since January 1968 an index series based on actual prices has been available and indices in this series have been linked with the implicit index for meals out for 16 January 1968, to obtain indices for meals out with 16 January 1962 taken as 100.

(1) From July 1971, revised method of calculation to include levies on certain imported food materials.

(2) Index of building costs: figures relate to average for the quarter.

(3) The index covers only dwellings on which building societies have advanced mortgages during the period. The cost of land is included. Figures relate to average for the quarter.

(\*) Reductions in the VAT-exclusive prices of alcoholic liquor, tobacco and cigarettes, matches and mechanical lighters took place in April. These reductions resulted from lower revenue duties designed to offset additional tax revenue from VAT. With unchanged prices in April for these products index numbers for months from April onwards would have been higher by the following: all manufactured products 1.7; chemicals and allied industries 0.2; products of manufacturing industries other than food, drink and tobacco and engineering and allied industries by less than 0.05.

(\*) Provisional.

(1) Based on manufacturers' list prices.

(2) The market-price series are based on prices before the addition of subsidies when paid to producers under the Cereals Deficiency Payments Scheme and Fatstock Guarantee Scheme.

(3) The gross-price series for wheat, cattle and pigs are based on prices after the addition of subsidies when paid to producers; that for milk on prices paid to producers by the marketing board and that for potatoes on producer prices, sometimes supported by the Potato Marketing Board.

(4) Maincrop potatoes only.

(5) Based on BEMF prices to producers under the Egg Contract Schemes until March 1970. From April 1970 until March 1971 based on guaranteed minimum prices to producers at packing stations and thereafter on average price paid to producers at packing stations.

(6) Based on net prices to farmers after deduction of subsidy. (7) Provisional.

### Note on supplementary table on projected Total population

These population projections for the whole of the United Kingdom are based on estimates by the Registrars General of the Total population at mid-1973. The projections have been prepared by the Government Actuary's Department in consultation with the Registrars General on the basis of the following agreed assumptions:

**Mortality:** Death rates at the outset are based on recent experience. At ages under 60 for males and under 70 for females death rates are assumed to decline over the period of the projection until, after forty years, they are three-quarters of present rates. Above these ages the assumed improvement becomes proportionately smaller as age advances until no improvement is assumed at ages over 90. At each age between 60 and 90 the assumed proportionate improvement is smaller for males than for females.

**Births:** The numbers of births implied in the projections are 751,000 live births in the year mid-1973 to mid-1974, 735,000 in 1974/75 and 732,000 in 1975/76 followed by a gradual increase of both births and fertility rates until 1983/84 when the number of births reaches 914,000. Thereafter age-specific fertility rates are held constant so that the births fluctuate in line with the numbers of young women, reaching a peak of 960,000 in 1989/90, then falling to 845,000 in 2001/02 and rising again to 950,000 in 2012/13, the last year of the projection. The ratio of male to female births has been taken as 1.06 for Great Britain and 1.07 for Northern Ireland.

**Migration:** For the year mid-1973 to mid-1974, allowance has been made for a net outward migration of 19,000, rising gradually to reach 50,000 a year from mid-1978 onwards.
